Introduction

This document outlines the different data sources used to compile the statistics presented in the June 2022 Criminal Justice System (CJS) Delivery Data Dashboard for all-crime and recorded adult rape offences. Each section details any data quality considerations for each source, outlines checks completed (by system owners and statistical processes) and flags any areas of concern. It also provides information on the modelling of local areas, in addition to guidance for interpreting local data and in-depth definitions of the metrics detailed in the Dashboard.

The local Dashboard contains a concentrated collection of published data from a variety of published sources across the Criminal Justice System, many of which are Official Statistics releases. The local Dashboard for all-crime and recorded adult rape offences presents all metrics at a national level and at the 40 Local Criminal Justice Board (LCJB) areas. Additionally, in the Dashboard, metrics from the crime recorded to police decision stage are published at Police Force Area level and metrics from the police referral to CPS decision to charge stage are published at CPS area level. For more granular court data at the CPS charge to case completion at the Crown Court stage, the [Crown Court Information Tool](#) publishes a number of select metrics down to Crown Court level that only feature in the Dashboard at a national level.

The local Dashboard represents the first time that more granular, local-level data has been published by some departments and therefore there are some specific cuts of data included within the Dashboard that are not included in some departmental quarterly statistical releases. Further details on these, including guidance for interpreting the data and data quality reports, can be found at the end of this document.

Data sources

Home Office

The data that forms the basis of the **Crime Recorded to Police Decision** stage of the Dashboard is produced using the official crime outcomes in England and Wales statistics. The exception to this is the metric that measures the volume of police referrals to the CPS either early advice or for a charging decision which is data captured by the CPS. There are three crime outcomes data sources:

- Aggregated Crimsec4 return: an aggregated return supplied on monthly basis from small number of police forces;
- Home Office Data Hub (HODH): The HODH allows police forces to provide record-level detail on offences;
- Voluntary returns: The Home Office requested that all forces providing Crimsec4 voluntarily provide additional outcomes data on a quarterly basis.

The Home Office receives monthly data from police forces on crime, crime outcomes and records that were initially recorded as crimes and subsequently transferred to another police force or cancelled. These data are quality assured and analysed by Home Office statisticians. Any anomalies or errors identified through this process result in a report being returned to the relevant force for validation or correction. Prior to the publication of crime outcomes, a verification exercise is carried out with all forces. The data held by the Home Office are returned to individual forces asking for confirmation that the data accords with that held on

HM Government

their own systems and to highlight any perceived inconsistencies in their data. Again, forces resubmit data if required.

The data covers the 43 territorial forces in England and Wales funded by the Home Office. The all-crime Dashboard only includes the notifiable offences that the territorial forces are required to inform the Home Office about. As such, it does not include Fraud and Computer Misuse Act offences which are reported to Action Fraud and recorded centrally.

At a 'national' level (England and Wales) the median days metrics do not include the following Police Force Areas: Greater Manchester, Kent, Staffordshire, West Midlands and Wiltshire. These forces did not provide offence-level data to the Home Office Data Hub for the reporting periods.

The volume of outcomes and offences does not include Greater Manchester Police for 2019 as they have not been able to supply outcomes data for the reporting period. When the required data is provided, these will be included in future publications of the Dashboard.

To allow like for like comparisons British Transport Police and Greater Manchester Police have been excluded from metrics reporting national totals under 'Increasing victim engagement', 'Improving quality of justice' and 'Volume'.

Crown Prosecution Service

The data that forms the basis of the **Police Referral to CPS Decision to Charge** section of the Dashboard is derived from the CPS Case Management System (CMS) used by CPS staff for case management purposes and its associated Management Information System (MIS). As with any large-scale recording system, data is subject to possible errors in entry and processing. The CPS does not publish official statistics. The figures are provisional and subject to change as more information is recorded by the CPS. The data is held within a database within the MIS, based on **suspects** (prior to being charged) or **defendants** (after being charged). The Dashboard includes total data on all suspects or defendants irrespective of sex or gender.

In these statistics, a suspect or defendant represents one person in a single set of proceedings, which may involve one or more charges. A set of proceedings usually relates to an incident or series of related incidents that are the subject of a police file. If a set of proceedings relates to more than one person then each is counted as a suspect or defendant. Sometimes one person is involved in several sets of proceedings during the same year: if so, they are counted as a suspect or defendant on each occasion.

The way in which the CPS collects data is the same whether it is at a national or local level, however you cannot add up local CPS data to create a national figure. This is because the CPS does some work which is not counted in local figures, so it will not appear in Police Force Area, LCJB or CPS Area volumes or rates.

The CPS monitoring of cases involving offences of child abuse, crimes against older people, domestic abuse, hate crime, modern slavery and rape involve the application of monitoring 'flags' or case-markers to applicable cases that are recorded on the CPS' electronic Case Management System (CMS). The data that are produced through the application of the flag are primarily used for monitoring performance on all cases that involve allegations or charges where these categories of criminal offending apply. The data are accurate only to the extent that the flags have been correctly applied.

HM Government

The flag is applied from the onset of the case and will remain in place even if the charges are later amended or dropped. If a case commences under a different offence but during the prosecution an applicable charge is preferred, the case is flagged at that stage.

An adult rape case is identified through the absence of a child abuse flag and the application of a rape flag. A child abuse flag is added to the case if there is a victim under the age of 18. A rape flag is added if there is a rape offence, including attempted, conspiracy and incitement, in the case. For further definition of offences applicable to both flags see [CPS published caveats](#).

It is also important to note that at this time, the CPS is unable to distinguish between Police referrals for early advice and referrals for a CPS charging decision. The focus on providing early investigative advice (especially regarding adult rape cases) will lead to an increase in referrals by the police, therefore caution should be taken when looking at the volume of referrals relative to metrics concerning CPS charging decisions. There is work ongoing to create data that separates the number of suspects submitted by the police for early advice and the number submitted for a charging decision.

Ministry of Justice

The data at the **CPS Charge to Case Completion in Court** stage is produced using the respective criminal court management information systems (MIS) and data warehousing facilities drawing data directly from court-based administrative systems. For the magistrates' courts data this is LIBRA and for the Crown Court data this is Xhibit while both jurisdictions also report data through the new Common Platform system.

LIBRA and Xhibit are used by court staff for case management purposes. This contains information about the incidences and dates of major events as each case proceeds in the criminal courts. Being from an administrative system, data are subject to clerical and inputting errors - the volume of these errors is low and assumed to be random across all cases. As such they are not believed to impact on the integrity of the data.

The 'Common Platform' is a new digital case management system for the magistrates' and Crown Courts. The system seeks to streamline data collection, data accessibility and improve the way criminal cases are processed across the Criminal Justice System. It will eventually replace the existing 'legacy' criminal court systems, with a single, streamlined system. The roll out of the Common Platform system remains ongoing across all criminal courts in England and Wales.

Most published metrics include Common Platform data. Where possible, estimates have been included to ensure that trends are robust and coherent. Where it is omitted, the data represents a small number of cases and does not impact any published trends in the current release. Work is ongoing with Her Majesty's Courts and Tribunal Service (HMCTS) and partner agencies to better understand the implications this system change has for the published National Statistics series, their uses (such as the Dashboard) and the underlying methodologies. We are committed to ensuring that these statistics remain accurate, robust and coherent for users during the operational transition of data systems at the criminal courts.

Information on where witnesses have provided evidence via section 28 has been obtained from the system used by court staff to schedule and manage the recording and playback of the recorded hearings and as such covers all such hearings carried out in the period covered by this report. As with other case management systems the data are subject to clerical and input errors, but the volume is low and is not expected to impact on the integrity of the data.

HM Government

This system does not record the offence(s) defendant(s) have been charged with; this information has been obtained by matching this data using unique case references to Xhibit (mentioned above) to extract and identify adult rape offences. The match rate achieved was over 95% and the missing items were mainly cases held on Common Platform. A very small number were missing for other reasons.

This data covers witnesses in cases with at least one adult rape offence

- Where the witness is the complainant, their identity is protected by legislation
- This covers live cases that may still be progressing through courts (virtually all other measures cover cases that have concluded).

Advice on using and interpreting the Dashboard data

The data within the all-crime and recorded adult rape Dashboard aims to capture the majority of the Criminal Justice System through metrics that break the system down into three key stages: crime recorded to police decision, police referral to CPS decision to charge, and CPS charge to case completion at Court.

Crimes recorded by the police and the subsequent outcomes allocated to these crimes are captured by Home Office. A subset of these offences will be referred on to the CPS for early advice, a charging decision, or prosecution. For some offences the CPS must make the charging decision before a prosecution can commence. Ministry of Justice and HMCTS data then captures all cases reaching the criminal court system from the point of receipt to completion. This data includes cases prosecuted by the CPS where the decision to charge was made by the police or the CPS. It also includes cases prosecuted by the CPS that were not investigated by the police, and cases prosecuted by other prosecuting authorities besides the CPS. While the metrics within the Dashboard do not allow for a read-across of data for the entire Criminal Justice System, they measure performance of the priorities at each of these three distinct stages.

The 2019 data used in the Dashboard is calculated as an average of the 2019 calendar year, Jan-Dec 2019. Including 2019 data provides a robust snapshot of performance of the CJS in 2019, prior to the pandemic, without setting a comparison with specific quarters of data and provides a useful barometer for assessing more recent system performance from Q1 2021 onwards. Quarterly variations in the majority of the Dashboard metric data for 2019 annual average figures are minimal which suggests the quarterly figures for 2019 are not notably impacted by reporting changes or seasonal variations.

There are several key points to consider when interpreting the data in the Dashboard metrics. These considerations apply universally to all three sets of data provided by the Home Office, CPS, and MoJ/HMCTS respectively:

Counting rules

Each department collects, collates and publishes metrics differently. The different counting basis relates to the operational priorities of each department, e.g., Home Office will count and consider all notifiable crimes recorded whereas the Ministry of Justice counts those which reach court – which will be the subset of notifiable offences resulting in charges, and a range of other summary offences that also result in a formal court case.

HM Government

Further information regarding the individual counting basis of each metric can be found in 'Metric definitions' and in the supporting documentation for each published release outlined at the end of this document.

Data linkage

It is not currently possible to accurately track individual offences or defendants across the Criminal Justice System for the purposes of statistical reporting. As such there are no overarching cross-Criminal Justice System metrics included within the current Dashboard. Work to better link the administrative data held across the Criminal Justice System is ongoing and is a high priority for enabling more joined up reporting and analysis of the drivers which impact the system as a whole.

Timing and movement of cases through the system

Although each metric is reported at the same point in time, this relates to a different point in the progress of a case through the Criminal Justice System. Comparisons across departmental measures will reflect these different stages. For example, the MoJ data will count defendants dealt with at court in a given quarterly period – these will result from offences recorded by the Home Office in earlier periods, and similarly referrals made to the CPS in earlier periods.

Offence allocation

The way that offences are selected for reporting differs across stages of the Dashboard. Although the same source list of defined offence codes is common across departments, the way that this is allocated to the underlying measures means that comparisons are difficult to accurately interpret. For example, the CPS will apply a rape flag to a suspect's case even if subsequently the rape offence is dropped, or the suspect is charged with a different offence (a sexual assault for example). The MoJ however, allocates the most serious offence in a case as the principal offence at the point of the case being received into the court system.

Use of mean and median in timeliness metrics

For policing metrics that measure timeliness within the Dashboard, the median number of days has been used as this excludes outliers (for example, due to recording errors) and represents a more accurate reflection of policing performance. For the timeliness metrics that measure CPS and court performance however, the mean number of days is calculated. The mean tells us about all cases, including the outliers which is an accurate reflection of what the CPS and courts deal with.

Arrows indicating net changes

Arrows within the dashboard that indicate net changes are only indicative of the directions of the change (e.g., an increase or decrease) and do not represent statistically significant changes. Arrows are coloured red or green to reflect whether, broadly speaking, the increase or decrease is a positive or negative change in system performance. Changes in percentage metrics are given as percentage point (ppt) change rather than percentage change.

Rounding data

Percentage metrics with values of typically less than 5% will be rounded to 1 decimal place. All other metrics will be round to 0 decimal places. The rounded figures will be used to determine whether to include an up or down arrow or whether there has been no change in a metric's performance.

Low volume and data suppression methodology

Breaking down Dashboard data to local areas increases the likelihood that LCJBs, Police Force Areas and CPS areas will report low volumes. To ensure that data from across government is presented universally in the Dashboard, low volumes are defined as values

HM Government

below 5. For metrics that report a value of 0, these values are not suppressed, and zeros will be published. For volume metrics that report a value between 1 and 4, or metrics calculated from a volume between 1 and 4, the data is labelled as “suppressed due to low volumes” in a footnote within the Dashboard. Values which are calculated from low values between 1 and 4, such as the net change between time periods, are also suppressed.

Reasons for missing data

If data is missing in the dashboard the reason will be displayed on the Dashboard as a footnote. The reasons are:

- *“Suppressed due to low volumes”* – see “Low volume and data suppression methodology” above.
- *“No data to calculate this field”* – this is used when it is not possible to calculate a metric, for example timeliness metrics when there are zero offences/cases.
- *“Data not available”* – this is used when the data is unavailable, for example because a police force was not able to provide data for a given period.

Population adjusted metrics

Dashboard metrics that measure volumes for Home Office and CPS data are also available as population-adjusted figures. These metrics are expressed as per 100,000 population for rolling annual data only. The population figures used are the same ones the Office for National Statistics (ONS) use to population adjust crime levels by police force area and are taken from the mid-2020 population estimates in table P3 published below:

<https://www.ons.gov.uk/peoplepopulationandcommunity/crimeandjustice/datasets/policeforceareadatatables>

Population adjustments can assist in comparing local areas by reducing the ‘extremes’ of large or more densely populated areas.

CSV documentation

A CSV file is available to download from the CJS Delivery Data Dashboard website which contains all values shown in the Dashboard. The table below describes each column of the CSV file.

Column	Description
offence_type	Whether the record refers to all offences or recorded adult rape offences.
metric_name	The metric name.
stage	The stage of the Criminal Justice System that the metric falls under. The three stages are: <ul style="list-style-type: none"> • Crime recorded to police decision • Police referral to Crown Prosecution Service (CPS) decision to charge • CPS charge to case completion in court
priority_area	The priority area within which the metric falls. The priority areas are five areas selected for improvement across the Criminal Justice System. They are: <ul style="list-style-type: none"> • Improving timeliness • Increasing victim engagement • Improving quality of justice • Volume • Rape review - progress against aims (for recorded adult rape metrics only)

geographic_granularity	Whether the record refers to national data or data for a local area. The available geographic granularities differ according to the metric. The options are: <ul style="list-style-type: none">• National (available for all metrics)• Local Criminal Justice Board (LCJB) area (available for all metrics)• CPS area• Police force area
geographic_area_name	The name of the geographic area: either "National" (England and Wales), or the name of a local area.
period	The period to which the record refers.
date_granularity	Whether the period column refers to a calendar year (January to December, labelled "Annual"), a rolling annual period, a quarter or a quarterly average (equal to the corresponding calendar year figure divided by four).
value	The value of the metric for the given geographic area and period. The value is shown with no rounding applied.
reason_for_missing_data	The reason if the value column is empty. This could be due to three reasons: <ul style="list-style-type: none">• <i>"Suppressed due to low volumes"</i>• <i>"No data to calculate this field"</i>• <i>"Data not available"</i> For more information, please see the "Reasons for missing data" section above.

Local-level data breakdowns

Home Office, CPS, MoJ and HMCTS - Local Criminal Justice Board areas

The Home Office, CPS, MoJ and HMCTS data for all Dashboard metrics are broken down to Local Criminal Justice Board areas in the all-crime and recorded adult rape offences Dashboard. There are 40 Local Criminal Justice Boards which map to individual or multiple Police Force Areas, as outlined at the end of this document. Local Criminal Justice Boards (LCJBs) are the forum in which local criminal justice partners come together to work in the common interest to improve the CJS in their local area. They are pivotal for local collaboration on important cross-system issues, and they work in partnership across agencies to improve the efficiency and effectiveness of the CJS at the local level and to improve the experiences of victims and witnesses.

Publishing all Dashboard metrics broken down at this level will provide oversight of the Criminal Justice System while increasing transparency of data at a granular level.

Home Office

There are 43 Police Force Areas at which relevant policing metrics in the all-crime and recorded adult rape Dashboard are published. The Dashboard data includes only the 43 territorial forces funded by the Home Office in England and Wales. The Home Office receives monthly data from police forces on crime, crime outcomes and records that were initially recorded as crimes and subsequently transferred to another police force or cancelled. See the below metrics definition tables for further details.

HM Government

Crown Prosecution Service

The CPS data can be presented in a national, or local-level format. Data from 14 CPS Areas are used when presenting local-level data alongside LCJB areas. The CPS operates across England and Wales, with 14 regional teams prosecuting cases locally. Each of these 14 CPS Areas is headed by a Chief Crown Prosecutor and works closely with local police forces and other criminal justice partners. To find out more about CPS Areas please visit www.cps.gov.uk. One CPS metric, 'Number of suspects referred by the police to the CPS' is also presented at Police Force Area level, in addition to national, LCJB and CPS Area level.

The data rules outlined earlier in this document (see the 'Data Sources' section) apply to CPS statistics whether they are captured at a national or local level. The CPS collects data for all the Dashboard metrics for all 14 CPS Areas. Generally speaking, suspects or defendants recorded in a specific area (e.g. East Midlands) will have been investigated for offences or committed offences in those areas. However, sometimes a CPS Area will take on work for another CPS Area. It is not possible to differentiate these cases in the data, so suspects and defendants are recorded to the CPS Area that is managing the case, and not the CPS Area local to the investigating police force. An example of this is most British Transport Police cases in England and Wales that are referred to the CPS for early advice, a charging decision, or prosecution, are managed by CPS West Midlands.

Ministry of Justice and HMCTS

National data represent all activity captured across the supporting criminal court administrative systems, regardless of whether a specific region or court location is known. There are instances where the geographic location of a case, defendant or trial is not currently known. This includes instances where: (i) data are 'new' and the associated information is not yet completed and (ii) data reported is incomplete and it is not possible to reliably identify a court location. Local breakdowns only include those cases where the court location is known. The sum of local level data will therefore not equate to the national figures.

The Crown Court Information Tool publishes a number of select metrics that are also published in the Dashboard at a national level. The Dashboard signposts to the [Crown Court Information Tool](#) where a more granular Crown Court level breakdown of key metrics can be found.

The 'flow' of cases and defendants through the criminal courts are not specifically tied to the location of an individual or the initial offence. As such, care should be taken when seeking to make direct comparisons with local level data presented by the Home Office or Crown Prosecution Service. For example, it is known that a high volume of adult rape cases are heard in London but offences will have been committed across England and Wales, with potentially differing locations recorded by the Home Office and CPS measures prior to reaching the Crown Court.

Metric definitions

The below tables detail the Dashboard metrics according to the Criminal Justice partner that collects the data and their accompanying definitions. The tables also indicate the point in the Dashboard series at which individual metrics will be included. While the majority were first included in the December 2021 publication, a small number are still in development and are listed here to indicate the additional data that will be collected for future series of the all-crime and recorded adult rape offences Dashboard. As the Dashboard is an iterative product, there are a number of new metrics that will be included for the first time in the June 2022 publication. These are appropriately indicated below.

HM Government

Home Office

Metrics in italics are those specific to the Dashboard for recorded adult rape offences.

Plain English metric name	Statistical metric name (linked, where possible to published statistics)	Statistical definition	Included in Dashboard from	Published at the following local areas:
Median days from offence recorded to a successful outcome for offences where there is a specific individual victim (a successful outcome is a formal - e.g. charge or caution - or informal - e.g. cannabis warning – police outcome)	Median days of offence recorded (victim) to informal/formal outcome	Median days is measured from when victim-based offences were recorded by the police to when a charge/ summons outcome was assigned on the local force record management system.	December 2021	All-crime and adult rape: LCJB area, Police Force Area
Median days from offence recorded to a successful outcome for offences where there are no specific individual victims (a successful outcome is a formal - e.g. charge or caution - or informal - e.g. cannabis warning – police outcome)	Median days of offence recorded (state) to informal/formal outcome	Median days is measured from when state-based offences were recorded by the police to when an informal/ formal outcome was assigned on the local force record management system.	December 2021	All-crime: LCJB area, Police Force Area
Median days from offence recorded to the police charging an offender where there is a specific	Median days of offence recorded (victim) to charge	Median days is measured from when victim-based offences were recorded by the police to when a charge/ summonsed outcome was assigned on the local force	December 2021	All-crime and adult rape: LCJB area, Police Force Area

HM Government

individual victim		record management system.		
Median days from offence recorded to the police charging an offender where there are no specific individual victims	Median days of offence recorded (state) to charge	Median days is measured from when state-based offences were recorded by the police to when a charge/ summonsed outcome was assigned on the local force record management system.	December 2021	All-crime: LCJB area, Police Force Area
Percentage of investigations closed because the victim does not support further police action	Crime outcomes - victim does not support (%)	The volume of outcomes for 'Evidential difficulties: Victim does not support action (both suspect identified and not identified). Divided by all outcomes assigned.	December 2021	All-crime and adult rape: LCJB area, Police Force Area
Number and percentage of police recorded offences where the offender is issued with a successful outcome for offences where there are specific individual victims (a successful outcome is a formal - e.g. charge or caution - or informal - e.g. cannabis warning – police outcome)	Volume/Proportion: Informal/formal outcomes (victim)	Volume of victim-based offences were recorded by the police where an informal/ formal outcome was assigned on the local force record management system. Proportions have been calculated by dividing the informal/ formal outcome counts by the total outcome counts for offences where there are specific individual victims.	December 2021	All-crime and adult rape: LCJB area, Police Force Area
Number and percentage of police recorded offences where the offender is issued with a successful	Volume/Proportion: Informal/formal outcomes (state)	Volume of state-based offences were recorded by the police where an informal/ formal outcome was assigned on the local force record management system.	December 2021	All-crime: LCJB area, Police Force Area

HM Government

<p>outcome for offences where there are no specific individual victims (a successful outcome is a formal - e.g. charge or caution - or informal - e.g. cannabis warning – police outcome)</p>		<p>Proportions have been calculated by dividing the informal/ formal outcome by the total outcome counts for offences where there are no specific individual victims.</p>		
<p>Number and percentage of police recorded offences where the investigation is closed because no suspect has been identified for offences where there are specific individual victims</p>	<p>Volume/Proportion: No suspect identified (victim)</p>	<p>Volume of investigation complete - no suspect identified outcomes for victim-based offences.</p> <p>Proportions have been calculated by dividing the no suspect identified outcome counts by the total outcome counts for offences where there are specific individual victims.</p>	<p>December 2021</p>	<p>All-crime and adult rape: LCJB area, Police Force Area</p>
<p>Number and percentage of police recorded offences where the investigation is closed because no suspect has been identified for offences where there are no specific victims</p>	<p>Volume/Proportion: No suspect identified (state)</p>	<p>Volume of investigation complete - no suspect identified outcomes, for state-based offences.</p> <p>Proportions have been calculated by dividing the no suspect identified outcome counts by the total outcome counts for offences where there are no specific individual victims.</p>	<p>December 2021</p>	<p>All-crime: LCJB area, Police Force Area</p>
<p>Number of recorded offences where there are specific individual victims</p>	<p>No. of recorded offences (victim)</p>	<p>Volume of victim-based offences.</p>	<p>December 2021</p>	<p>All-crime and adult rape: LCJB area, Police Force Area</p>

HM Government

Number of recorded offences where there are no specific victims	No. of recorded offences (state)	Volume of state-based offences.	December 2021	All-crime: LCJB area, Police Force Area
TBC	<i>Percentage of victims without a phone for more than 24 hours</i>	TBC	TBC	
Percentage of cases which result in a charge (out of all adult rape cases with any outcome assigned)	Proportion of crime investigations which result in a charge outcome out of all those cases with a closed investigative outcome	<i>The number of crimes which result in a charge as a proportion of all crimes with an investigative outcome closed in the same year. This could include cases recorded in a previous time period.</i>	December 2021	Adult rape: LCJB area, Police Force Area
Percentage of cases which result in a charge (out of all adult rape cases recorded)	<i>Percentage of cases which result in a charge (out of all adult rape cases recorded)</i>	<i>This metric is an alternative charge ratio metric. This differs to the metric above because it calculates the percentage of crimes where a decision has been made to charge, out of the total number of crimes recorded in the same quarterly period. These include open and completed investigations – investigations where a decision has been made and investigations where a decision has not yet been made.</i>	December 2021	Adult rape: LCJB area, Police Force Area

Additional definitions

Police Recorded Crime

- Victim based** - all police-recorded crimes where there is a specific victim. This victim could be an individual, an organisation or corporate body. This category includes violent crimes directed at a specific individual or individuals, sexual offences, robbery, all theft offences (including burglary and vehicle offences), criminal damage and arson. It excludes fraud and computer misuse act offences which are not recorded by the territorial forces in England and Wales but centrally by the National Fraud Intelligence Bureau at the City of London Police.

HM Government

- **State based** - all police-recorded crimes where there are no specific individual victims and this includes public order offences, drug offences, possession of weapons other miscellaneous crimes against the state.
- **Adult rape offences** include offence codes: rape of a male aged 16 or over (19F) and rape of a female aged 16 or over (19C).

Police recorded crime investigations

- **Successful Outcomes** consists of the following outcomes: Charged/Summoned (outcome 1), Taken into consideration (outcomes 4), Out-of-court formal (outcomes 2, 3 & 6) and Out-of-court informal (outcomes 7 & 8).
- All '**Other outcomes**' used in the rape Dashboard is all outcomes apart from a charge or summons.

Crown Prosecution Service

Please note the links below take you to the specific Excel file containing the metric. To read about the CPS quarterly publication which provides commentary on the data that is published and explains further how to interpret CPS data, please click [here](#).

Metrics in italics are those specific to the Dashboard for recorded adult rape offences.

Plain English metric name	Statistical metric name	Statistical definition	Included in Dashboard from	Published at the following local areas:
Mean days from first police referral to CPS making the decision to authorise a charge	Mean days from police referral to CPS decision to charge	The number of calendar days from the first referral by police to the CPS making a decision to charge. The police may have referred for an early advice or charging decision. This metric is the total time taken and may include multiple CPS consultations and time taken by the police to complete further investigative work.	December 2021	All-crime and adult rape: LCJB area, CPS area
Percentage of CPS consultations completed within 28 days (a consultation occurs when a CPS prosecutor has considered new information received from the police)	Proportion of CPS consultations completed within 28 days	The proportion of consultations completed within 28 calendar days. Charging pilot custody cases are excluded due to a different timescale of 3 hours.	December 2021	All-crime and adult rape: LCJB area, CPS area

HM Government

and completes a legal review) The metric does not include legal reviews completed after the CPS has made the decision to authorise a charge.				
Percentage of prosecutions that are stopped post charge because a victim did not provide evidence or has withdrawn	Proportion of prosecutions that are stopped post charge because a victim did not provide evidence or has withdrawn	The proportion of non-convictions where the victim no longer supports the prosecution, does not, or refuses to attend. When a prosecution is ongoing a victim is referred to by the legal term complainant. The data presented is sourced from CPS data that uses the term complainant.	December 2021	All-crime and adult rape: LCJB area, CPS area
Percentage of CPS charged prosecutions that are stopped due to an incorrect charging decision (based on an assessment by a lawyer, at any time during prosecution proceedings, that the charge authorised by the CPS was incorrect)	Proportion of CPS charged prosecutions stopped due to an incorrect charging decision	The proportion of all prosecutions where a charge was authorised by the CPS that were not convicted due to an incorrect charging decision.	December 2021	All-crime and adult rape: LCJB area, CPS area
Percentage of cases where appropriate legal decisions are made	Percentage of cases where appropriate legal decisions are made	TBC	August 2022	
Percentage of cases that meet the national file quality standard (this relates to a universal standard for file quality which is determined by the Directors Guidance on Charging, used by police officers and prosecutors)	Proportion of cases that meet the national file quality standard	TBC	August 2022	

HM Government

Number of suspects where the CPS has made a legal decision to either: authorise a charge, advise the police the prosecution code has not been met, or to make an out of court disposal	Volume of pre-charge legal decisions	The volume of suspects referred by the police for a charging decision and the CPS have given a legal decision. A legal decision is either a charge, no further action or out of court disposal.	December 2021	All-crime and adult rape: LCJB area, CPS area
Number of suspects authorised to be charged by CPS	Volume of suspects authorised to be charged by the CPS	The volume of suspects referred by the police for a charging decision and the CPS has authorised a charge. A charge means that a first hearing has been registered on CPS case management system.	December 2021	All-crime and adult rape: LCJB area, CPS area
Percentage of legal decisions by the CPS that result in a charge	Percentage of legal decisions by the CPS that result in a charge	The proportion of all legal decisions where a charge was authorised by the CPS as the CPS is satisfied that the legal test for prosecution, set out in the Code for Crown Prosecutors, is met: there is enough evidence to provide a 'realistic prospect of conviction' against each defendant and the prosecution is in the public interest. This is published on the CPS website as part of the quarterly publication.	June 2022	All-crime and adult rape: LCJB area, CPS area
Percentage of legal decisions by the CPS where the prosecution code has not been met	Percentage of legal decisions by the CPS where the prosecution code has not been met	The proportion of all legal decisions where the Code for Crown Prosecutors is not met for either evidential or public interest reasons, the CPS has decided that no further action should be taken against the suspect. This is often abbreviated to 'NFA' or referred to as a 'no prosecution' decision. This is published on the CPS website as part of the quarterly publication.	June 2022	All-crime and adult rape: LCJB area, CPS area

HM Government

Percentage of legal decisions by the CPS that result in an out of court disposal	Percentage of legal decisions by the CPS that result in an out of court disposal	<p>The proportion of all legal decisions that result in an out of court disposal. This is published on the CPS website as part of the quarterly publication.</p> <p>Out of court disposals include simple and conditional cautions, reprimand, final warning or taken into consideration (TIC) following a CPS decision that this is the most appropriate action to take. The data only contains cases referred to the CPS for a charging decision.</p>	June 2022	All-crime and adult rape: LCJB area, CPS area
Number of suspects finalised as 'pending response – further investigation' (previously named as admin finalised)	Volume of suspects finalised as pending response – further investigation	Decisions recorded as pending response – further investigation (formally known as Administrative finalisations) are finalised in the CPS Case Management System for administrative reasons following a request for further information being sent to the investigating authority. These are not legal decisions and may not be the end of the case.	December 2021	All-crime and adult rape: LCJB area, CPS area
Number of prosecutions where the decision was made by the CPS to stop the prosecution	Volume of prosecutions dropped	The number of prosecutions that were stopped by the CPS.	December 2021	All-crime and adult rape: LCJB area, CPS area
Number of suspects referred by the police to the CPS for either early advice or for a charging decision	Volume of referrals from the police for a charging decision	<p>The volume of suspects referred by the police, a suspect is only counted once for either early advice or a charging decision.</p> <p>At this time, it is not possible to separate the data on suspects referred for early advice</p>	December 2021	All-crime and adult rape: LCJB area, Police Force Area, CPS area

		and suspects referred for a charging decision. The CPS and police have taken the active policy decision to increase the use of early advice to help improve quality. This means that comparison with historical data will need to be conducted with caution.		
Number of suspects awaiting a charging decision by CPS, or early advice to be provided by CPS or with the police to conduct further investigation Pre-charge caseload	Volume of outstanding pre-charge proceedings	The volume of suspects live on the CPS Case Management System at the end of a reporting period, and which are carried forward into the next reporting period. The pre-charge case volume metric will include all cases that are live on the CPS system. This means that it will include suspects that have been returned to the police for further investigation.	June 2022	All-crime and adult rape: LCJB area, CPS area
Number of defendants with current live proceedings in magistrates' courts and at the Crown Court	Volume of outstanding prosecution proceedings	The volume of defendants live on the CPS Case Management System at the end of a reporting period, and which are carried forward into the next reporting period. The post-charge case volume metric includes all prosecution cases live on the CPS Case Management System at the end of each quarterly period, in magistrates' courts and at the Crown Court. The data will include cases in the magistrates' courts which will subsequently be sent to the Crown Court for trial as well as those dealt with summarily. The metric excludes cases committed for sentence	June 2022	All-crime and adult rape: LCJB area, CPS area

		at the Crown Court, appeals, extradition and proceeds of crime proceedings.		
<i>Number of suspects where CPS have closed the suspect's file on the CPS case management system after a legal decision is made or where further investigation is required prior to a charging decision</i>	<i>Volume of finalised pre-charge decisions</i>	<i>The volume of suspects referred by the police for a charging decision which has been finalised on the CPS Case Management System. This includes legal decisions and cases finalised as awaiting response – further investigation.</i>	<i>December 2021</i>	Adult rape: LCJB area, CPS area

Ministry of Justice

Metrics in italics are those specific to the Dashboard for recorded adult rape offences.

Plain English metric name	Statistical metric name	Statistical definition	Included in Dashboard from	Published at the following local areas:
Number of outstanding cases which have been at the Crown Court for more than 12 months	<u>Volume of outstanding cases "for trial" older than 12 months</u>	Outstanding duration refers to the time between the receipt of a case in a specific Crown Court and the end of the reporting period, for example counts in Q3 2020 relate to cases which are open as at the end of September 2020. 'For trial' cases are assigned at the point of receipt into the Crown Court - we know that most of these cases will result in the entry of a guilty plea and that only a minority will require a trial.	December 2021	All-crime and adult rape: LCJB area
Number of outstanding cases which have been at the Crown Court for more than 12 months (custody cases)	<u>Volume of outstanding cases "for trial" older than 12 months (custody)</u>	Outstanding duration refers to the time between the receipt of a case in a specific Crown Court and the end of the reporting period, for example counts in Q3 2020 relate to cases which are open as at the end of September 2020.	March 2022	All-crime and adult rape: LCJB area

HM Government

		'For trial' cases are assigned at the point of receipt into the Crown Court - we know that most of these cases will result in the entry of a guilty plea and that only a minority will require a trial. This metric is calculated for cases where the principal defendant is in custody.		
Number of outstanding cases which have been at the Crown Court for more than 12 months (non-custody cases)	Volume of outstanding cases "for trial" older than 12 months (non-custody)	Outstanding duration refers to the time between the receipt of a case in a specific Crown Court and the end of the reporting period, for example counts in Q3 2020 relate to cases which are open as at the end of September 2020. 'For trial' cases are assigned at the point of receipt into the Crown Court - we know that most of these cases will result in the entry of a guilty plea and that only a minority will require a trial. This metric is calculated for cases where the principal defendant is not in custody, including a small number of cases where the custody status is 'unknown'.	March 2022	All-crime and adult rape: LCJB area
Mean days from charge to case completion at the Crown Court (completion means any outcome, including guilty pleas, acquittals and convictions)	Mean days from charge to completion at Crown Court* *End-to-end timeliness estimates are provided as part of the Criminal Court Statistics Quarterly release (Table 4). Table 4 includes estimates from offence to completion but does not currently include an estimate from	Estimated mean durations in days from a charge being given (prior to entering the criminal courts) and the completion of the case – this is based on the number of defendants in valid cases that were disposed of in the reporting period. Valid case counts exclude appeals, 'bring backs' and 'committals for breach' (sentence cases only), transfers out and cases which have been issued a bench warrant and cases which have	December 2021	All-crime and adult rape: LCJB area

(where no further action is required by the magistrates' courts)	serious cases at Magistrates' court	Magistrates' courts during the specified time period, where no further action is required by the Magistrates' courts.		
Guilty plea rate at Crown Court (as a proportion of all defendants who enter a plea, e.g. guilty, not guilty and dropped)	Guilty plea rate for defendants dealt with at the Crown Court	The guilty plea rate is calculated as the volume of defendants who plead guilty as a proportion of all defendants who enter a plea, e.g. guilty, not guilty and dropped.	December 2021	All-crime and adult rape: LCJB area
Percentage of defendants who plead guilty before a trial starts	Proportion of defendants who plead guilty prior to trial	A guilty plea is recorded when a defendant: (i) pleads guilty to all counts; (ii) pleads guilty to some counts and not guilty to others and no jury is sworn in respect of the not guilty counts; or (iii) pleads not guilty to some or all counts but offers a guilty plea to alternatives which are accepted (providing no jury is sworn in respect of the other counts). The stage at which a defendant pleaded guilty is calculated from the hearing type entered by the court, e.g. prior to trial includes guilty pleas entered at the plea hearing, at the plea and case management hearing or at a newton hearing (no further trial time required).	December 2021	All-crime and adult rape: LCJB area
Percentage of cases which result in a completed trial plus guilty pleas (an aggregated metric that represents both percentage of cases which resulted in a completed trial and guilty plea rate at the Crown Court)	Cases dealt with where the case was not dropped following commencement at the Crown Court	An aggregated metric that represents both percentage of cases which resulted in a completed trial and guilty plea rate at the Crown Court.	December 2021	All-crime and adult rape: LCJB area
Number of completions (completion means receiving any	Disposals (All cases)	Disposals include cases where a disposal is recorded against each defendant and all their	December 2021	All-crime and adult rape: LCJB area

outcome, including guilty pleas, acquittals and convictions)		offences and cases that are transferred out.		
Number of outstanding cases at the Crown Court (excluding cases where the case can't progress because the defendant is absent)	Outstanding caseload volumes	A count of all cases where one or more offences remains incomplete at the end of the period. Outstanding cases exclude cases that have a live bench warrant issued on the case, at the end of the period.		All-crime and adult rape: LCJB area
Number of receipts (cases arriving at the Crown Court)	Volume of receipts	<i>Volume of receipts for recorded adult rape offences.</i>	<i>December 2021</i>	Adult rape: LCJB area
Number of witnesses who have given evidence via section 28 in a case with at least one adult rape offence	<i>Number of witnesses who have given evidence via section 28 in a case with at least one adult rape offence</i>	<i>This is the number of witnesses who have provided evidence via Section 28 in a case where the defendant(s) have been charged with at least one adult rape offence. In some instances, the witnesses may have provided evidence in the same case against the same defendant(s). The use of Section 28 is a decision for the judiciary based on the circumstances of that case. The intention of the metric is to monitor uptake of Section 28, not assess individual decisions.</i> <i>Quarterly data for this metric is only available from Q1 2021 (Jan-Mar 2021) onwards. Rolling annual data is only available at this metric for the year to Q4 2021 (Jan-Dec 2021)..</i>	<i>December 2021</i>	Adult rape: LCJB area,
